Education

MsC in Computer Science **08/2022 - 12/2024**
Federal University of Minas Gerais (UFMG) GPA: 4.6/5.0

Advisor: Professor Martín G. Ravetti

Recipient of CAPES Masters Scholarship (2022 - 2024)

Graduate Diploma in Systems Analysis and Development **06/2021- 12/2023**
Pontifical Catholic University of Minas Gerais (PUC Minas) GPA: 4.9/5.0

Awarded Best Project of a Mobile App in class - PUC Minas (2022)

Bachelor of Science in Business Administration **06/2017 - 09/2021**
Federal University of Minas Gerais (UFMG) GPA: 4.6/5.0

Graduation thesis: Robustness of the public transport network of Belo Horizonte, advised by Professor Tiago A. Schieber

Relevant subjects: Undergraduate courses: Calculus, Analytical Geometry and Linear Algebra, Operational Research, Statistics I and II. Graduate courses: Stochastic Programming, Design and Analysis of Algorithms, Heuristics and Metaheuristics

Skills

Programming: R, Python, SQL, C++, C#, Html, CSS and JavaScript, Git

Languages: Portuguese (fluent), English (fluent), Spanish (intermediary) and French (elementary)

Certificates: English level B2 - PET (2013) e FCE (2014), from the University of Cambridge

Work Experience

Data Science Intern **04/2022 - 08/2022**
RaiaDrogasil

- Developed an implicit recommendation system for product pages, based on product's category
- Optimized NLP-based categorization of apps' ratings and comments from 60% to 85% accuracy, providing better insights for the customers relations teams and internal performance indicators
- Tech Stack: Python | SQL | AWS | GitLab

Special Projects Intern **09/2019 - 07/2021**
Municipality of Belo Horizonte

- Cleaned up personnel information in proprietary software
- Emitted, checked and altered data in SQL reports

Research Experience

Research fellow **03/2020 - 08/2021**
Administrative Sciences Department - UFMG | Advisor: Professor Tiago A. Schieber

- Developed a research in Network Science on the detection of anomalies in bidding processes, constructing a measure to check abnormal interactions in the networks
- Took part in a research group on modeling the pandemic with 91% accuracy, using Artificial Intelligence, Machine Learning techniques and Network Science concepts
- Cleaned data, modeled the network, analyzed and generated the result graphs with R

Research fellow**08/2017 - 08/2019***PET Administration - UFMG | Advisor: Professor Deise L. Ferraz*

- Consolidated team work abilities in a self-organized group with demands in research and extension, including the planning and execution of workshops, talks, radio programs and qualitative research
- Was the editor in chief of a student academic magazine, Multifaces, from 01/2018 to 08/2019, leading an editorial team with 7 members in the publishing process of 2 editions and organizing the commemoration of the 10 year anniversary of the magazine

Research junior fellow**07/2015 - 12/2016***CEFET-MG | Advisor: Christiano Rocha, MsC*

- Was oriented in a research in enumerability and infinity, which resulted in a presentation in a local conference organized by CEFET-MG
